

KAVIDU DUSHAMANTHA

Software Engineering Undergraduate

Colombo, Sri Lanka

 +94 773005419  dushmanthakavidu143@gmail.com  [LinkedIn](#)  [GitHub](#)  [Portfolio](#)

Summary

Results-driven Software Engineering Undergraduate specializing in full-stack development (MERN) and microservices architecture. Adept at architecting secure, scalable web applications utilizing Spring Boot, React, and RESTful APIs. Possesses practical academic experience in application security testing and cloud deployments. Strong collaborator with a proven track record of delivering user-centric, decentralized software solutions and refining clean coding practices.

Technical Skills

Languages: JavaScript, Java, PHP, HTML/CSS, SQL

Frameworks & Libraries: React.js, Redux, Node.js, Express.js, Spring Boot, Spring Cloud, Tailwind CSS, Bootstrap

Databases: MongoDB, PostgreSQL, MySQL

Developer Tools & Cloud: AWS (EC2), Docker, Git/GitHub, Vite, Postman, Burp Suite, PortSwigger, Vercel, Render, Cloudinary, Figma

Education

University of Kelaniya

BSc (Hons) Software Engineering | CGPA: 3.61

Kelaniya, Sri Lanka

Apr. 2024 – Present

- Specializing in Net-Centric Applications, Data Science Engineering Applications, and Health Informatic Applications.

Niwaththakachechiya National College

Secondary Education | Z-Score: 1.4966

Anuradhapura, Sri Lanka

Mar. 2021 – Jan. 2023

Projects

Chronolux E-Commerce Platform

React, Redux, Node.js, Express, MongoDB, AWS EC2

Individual Project

 [Live](#) |  [Repo](#)

- Developed a full-stack MERN e-commerce application featuring 10+ interconnected UI components tailored for purchasing luxury watches.
- Successfully deployed the application to a production environment by provisioning an AWS EC2 instance and mapping to a custom GoDaddy domain.
- Engineered secure user authentication, mitigating unauthorized access by 100% utilizing JSON Web Tokens (JWT).
- Implemented global state management using React Redux, accelerating state retrieval across 5+ core application pages.

Stall / Slot Reservation System

React, Spring Boot, PostgreSQL, JWT

Academic Group Project

 [Repo](#)

- Collaborated in a team environment to engineer a decentralized booking application.
- Strengthened system security by implementing a robust 2-factor authentication (OTP) system and stateless JWT authorization.
- Managed 15+ RESTful API endpoints.

Projects (Continued)

villaHUB

React.js, Node.js, Express.js, MongoDB, REST APIs

Individual Project

 [Frontend](#) |  [Backend](#)

- Developed a full-stack web application supporting the management of 50+ property listings on a unified, responsive platform.
- Integrated over 10+ RESTful APIs to handle secure user registration, authorization, and real-time email verification protocols.
- Built dynamic listing functionalities, reducing manual booking conflicts to zero through real-time availability tracking.

PaperHUB

React, Node.js, Express, MongoDB, Tailwind CSS, JWT

Individual Project

 [Repo](#)

- Developed a centralized full-stack MERN application supporting the categorization and search of 100+ academic study materials.
- Constructed efficient file handling functionalities including paper upload and downloads with fast processing responses.
- Engineered an administrative dashboard managing access control for 2 distinct user roles, improving content moderation efficiency.

Certifications & Languages

Certifications: Complete Web Development Bootcamp (Udemy)

Languages: English (Professional Proficiency), Sinhala (Native)
